

Boat Winch

Key Components:

- **Drum:** The cylindrical part where the line or rope wraps around.
- **Handle or Crank:** Used to manually operate the winch.
- **Gear System:** Provides the mechanical advantage.
- **Brake or Clutch:** Prevents slippage and helps control loads.
- **Motor (for electric winches):** Provides the power for automatic operation.

Considerations When Choosing a Boat Winch:

- **Capacity:** Ensure it can handle the load you expect to pull or lift.
- **Power Source:** Manual or electric, depending on your needs and preferences.
- **Material:** Stainless steel or corrosion-resistant materials are ideal for marine environments.
- **Size:** It should fit the space available on your boat or trailer.

Model		JC -E1	JC-E2	JC-E3
Safe Working Load	t	1	2	3
Test Load	kn	12.25	24.50	36.75
Cable Size	mm x m	8 x 40	9.5 x 40	12.7 x 40
Min. Pulling Force	n	120	152	200
Net Weight	kg	19.7	25.1	44.3
